1925 State Census of Johnson County, Kansas

A publication of
Johnson County Genealogical Society and Library, Inc.

ON THE COVER: Located on the southeast corner of present day 80th Street and Santa Fe Drive in Overland Park, Kansas, this building had the dual role of office for the Strang Land Company and a station on the Strang Line. William B. Strang Jr. (1857–1921) was an American railroad magnate who platted Overland Park and is considered the founder of the community. In 1905, Strang purchased 600 acres in Johnson County, Kansas, southwest of present day 80th Street and Metcalf Avenue. Strang envisioned a "park-like" community that was well planned and self-sustaining. He also sought strong commerce, quality education, vibrant neighborhoods, convenient transportation and accommodating recreational facilities. An entrepreneur, Strang also founded the *Missouri and Kansas Interurban Railway*, nicknamed the "Strang Line", which ran from Olathe, Kansas to Kansas City, Missouri until 1940. In addition he established an airfield and provided land for schools and businesses along with his creation of several housing developments along the route. Santa Fe Drive in Downtown Overland Park marks a portion of the original Strang Line. The Strang Car Barn, at 79th and Santa Fe Drive, which housed trolley cars for the line, and the Strang Carriage House in the Santa Fe Commons Park, south of 80th and Santa Fe, are remnants of the Strang Line. – *Wikipedia.com*

ACKNOWLEDGMENTS

It hardly seems adequate to say that the heartfelt thanks of the Society go to all of those who gave so much time and effort to assist in bringing this information to you, the researcher. Without their labors this book would not be possible. This project has taken many years for completion and memory dims. With apologies for any omissions, they are:

Marsha Donaldson
Karen Hinkamp
Loretta Hower
Mel Kirk
Larry May
Pam Miller
Ruth Sanderson
Linda Stewart
Paul Troutman

This is a publication of the *The Johnson County Genealogical Society and Library, Incorporated* in fulfillment of its objectives to further the study of family history in general and to aid the research of vital records of Johnson County, Kansas in particular. The Society is a tax exempt non-profit organization with membership open to all who are interested in genealogy and family history and who share the society's interests. Regular meetings are held at 10:00 a.m. the 4th Saturday of each month except December at the Johnson County Central Resource Library, 9875 W. 87th St., Overland Park, Kansas 66212. Visitors are always welcome. Programs are aimed at helping members and visitors progress with their individual genealogical research and feature speakers on a variety of related topics. Individual advice and help is available for the asking. One meeting per year is generally set aside for a seminar featuring a nationally-known speaker and is held at another venue. The Johnson County Genealogical Society and Library, Inc. is pleased to offer this source to genealogists, local historians, librarians and others interested in historical events. Our wish is that everyone who uses this book will find the information they desire. Happy searching!

DISCLAMER: The information presented here is intended only as a guide for closer research. The transcriptions were made by a number of volunteers. All of them were careful to transcribe names and other information as it appears in the record; however, due to the difficulty of reading early styles of penmanship some names and other information may be misspelled or, for the same reason of penmanship, some information may have been misinterpreted. Johnson County Genealogical Society and Library, Incorporated assumes no liability for inaccuracies. Finally, by alphabetizing the names we have eliminated the possibility of the insight that is sometimes gained by seeing the names in a census in the order they were recorded, grouped by families with neighbors on either side, but that's the price paid for a usable research tool. **For all of these reasons researchers are urged to view the original records to verify the information given here.** Transcriptions were made from microfilm in the permanent collection of the Johnson County Central Resource Library, 9875 W. 87th St., Overland Park, KS 66212. The original enumeration sheets and microfilm may be seen at the Kansas State Historical Society Library, 6425 SW Sixth Ave., Topeka, KS 66615-1099 (*kshs.org*). The microfilm is also available through most local libraries by interlibrary loan.

FOREWORD

Census reports can contain a large amount of information about your family. If you are successful and find people of interest in this index of the 1925 Johnson County, Kansas census, there are some things about this census and this index that you need to know so you are able to get the best results from your research.

REGARDING THE CENSUS:
The 1925 Kansas State Decennial Census was taken under the auspices of the State Board of Agriculture. The census consists of seven schedules. Each schedule has specific information to gather. The person who gathered the information was called the "assessor".

Schedule 1 is the Population Schedule. An assessor was required to make a personal visit to each dwelling house and to each family in his township or city. He was to ask a family member, if available, or some other knowledgeable person, if necessary, for the name, age, place of birth of each member of the family and to fill in each applicable blank on the sheets furnished by the State Board of Agriculture. Each page of this census consists of two sheets with a total of twenty-three columns of potentially important data recorded by the assessor.

Schedule 2 is the Agricultural Schedule. Each page can list up to 32 farmers. Each farmer is named and his post office address is given on the first sheet. There are 6 sheets per page with a total of 87 columns for each of the farmers to enter information in any that are applicable to his farm. These data are used to gather information about the size, use, productivity, etc. of each farm. The information thus gathered was to be used only for statistical purposes by the State Board of Agriculture and not be connected in any way to the taxation made by other departments. Schedules 3-7 are self-descriptive and are titled as follows:

Schedule 3 Creameries, Confectionaries, Ice Cream and Cheese Factories.
Schedule 4 Deaf Mute, Blind, Idiotic, and Insane in private homes
Schedule 5 Civil War (1861-1865) Military Records
Schedule 6 Church Organizations
Schedule 7 Pauperism and Crime.

The "Instructions to Assessors" notes "All inmates of the state charitable institutions, which include the hospitals for the insane at Topeka, Osawatomie and Larned, for the epileptics at Parsons, the State Training School at Winfield, the Boys' Industrial School at Topeka, the Girls' Industrial School at Beloit, and schools for the deaf at Olathe and the blind at Kansas City, and the Tubercular Sanatorium at Norton, must be listed as inhabitants of the cities or townships of the respective counties from which they were sent. Therefore, assessors should seek this information, in making their enumeration, from the head of the family or other competent authority, and include any inmates of such institutions from their districts in the population schedules...the deaf mute, blind, idiotic and insane in private homes should also be listed by name in Schedule 4… The inmates of the State Penitentiary or the Hutchinson State Reformatory are not to be enumerated as they are not citizens under the law. Students temporarily away from home attending school should be enumerated where their parents or guardians live..." The total enumerated population for Johnson County, Kansas in 1925 was 21,816.

© 2014, Johnson County Genealogical Society and Library, Inc. Reproduction without permission is prohibited.

This index includes data from Schedule 1 only. If you wish to expand your research to any of the other six Schedules, that information is available from the Kansas State Historical Society (KSHS) in Topeka, and from Ancestry.com by subscription. Check your local library to learn if their subscription includes Kansas State Censuses. The fourteen branches of the National Archives and Records Administration (NARA) are good sources.

There are possible pitfalls when studying a census sheet. Spelling, handwriting and numbers are problematical. Dittoes seem to have been used randomly and often. The listed gender of a person may not agree with the name and/or relationship as listed. All relationships mentioned are intended to refer to the head of house. All sons and daughters named in the household will be his children. They may be his wife's children also, but this census does not tell us that. The step sons and step daughters are the wife's children from an earlier marriage. A sister-in-law may be the wife's sister, or she may be the wife of a brother of the Head of house. It is necessary to verify any information found on a census sheet with other sources. When a name is on a census sheet, it shows that this person lived in a specific state, county, and township or city and the date he was there. The official governmentally declared date for the Kansas census of 1925 was March 1. The dates the assessor actually took down the information will vary, but are rarely shown on the census sheet. According to the instructions, the assessor was supposed to take the information as of the official date of March 1, 1925. If a baby was born after March 1, the name of that child should not appear on the census sheet. If a person died after March 1, the name of the deceased should be on the census sheet.

REGARDING THIS INDEX:
In order to benefit from your search here, you need to be familiar with our procedure and what various entries mean. In 1925 there were seven cities and ten townships in Johnson County, Kansas. We abbreviated the names of the geographical subdivisions to fit into a small column on the index page by using the first three letters of each geographical subdivision. Examples: Shawnee became SHA and Olathe is OLA. There was one exception. Spring Hill is identified by SPH. Four of the cities were in townships with the same name. In order to correctly identify each one, we added a C for each city and a T for each township. Examples: SHA-C and SHA-T and OLA-C and OLA-T. The following is a list of the cities and townships as abbreviated:

DeSoto City	DeS-C	Edgerton City	EDG-C	Gardner City	GAR-C
Lenexa City	LEX-C	Olathe City	OLA-C	Shawnee City	SHA-C
Spring Hill City	SPH-C	Aubry Twp.	AUB-T	Gardner Twp.	GAR-T
Lexington Twp.	LEX-T	McCamish Twp.	McC-T	Mission Twp.	MIS-T
Monticello Twp.	MON-T	Oxford Twp.	OXF-T	Olathe Twp.	OLA-T
Shawnee Twp.	SHA-T	Spring Hill Twp.	SPH-T		

Three political entities have four sections in this census—Mission Township, Shawnee Township and the city of Olathe. Several other townships have two sections each. The distinctions among the sections are necessary because the assessors numbered each section separately, starting each section with page 1. Thus, we also had to number each section from page 1. Examples: Mission Township 1 became MIS-T-1; Mission Township 2 is MIS-T-2; Mission Township 3 became MIS-T-3 and MIS-T-4 is used for the fourth section of Mission Township. In order for you to

© 2014, Johnson County Genealogical Society and Library, Inc. Reproduction without permission is prohibited.

find your people on the original paper census sheets in Topeka, you will need to know these abbreviations so you can request the correct section of the city or township named in the index.

Unfortunately, some of the census sheets were not microfilmed, and consequently are not on Ancestry.com, or any other organization that got their information from the microfilm. First, the city of DeSoto (DeS-C) has only pages 1-8 on microfilm. Pages 9-14 are missing. Second, the city of Edgerton (EDG-C) is not on microfilm except for pages 8-10, which were somehow filmed as part of DeSoto. Third, Shawnee Township section 2 (SHA-T-2), page 39 and Olathe City section 2 (OLA-C-2), page 28 are not on the microfilm. Some pages do not have a second sheet, for unknown reasons. The city of Shawnee (SHA-C), page 18 and Shawnee Township section 2, (SHA-T-2), pages 37, 38 and 39 lack this sheet. This is the sheet that provides information about the place of birth of each person, where they came from to Kansas, immigration and citizenship information, and their occupations. **All of these missing pages, except the various missing second sheets which were never made by the assessors, have been recorded from the KSHS original census sheets and are included in this index**.

The first page of the city of Olathe 1 (OLA-C-1) begins with the names of two young sons named Russell, 8 years of age, and Marvin, 3 years of age. There is no surname given. These boys should be part of family number 736 since the next family after the boys is 737. NOTE—this information was found by referring to family numbers that appear on the census sheets but are not included in this index. On page 35 of the City of Olathe 2 (OLA-C-2), the last family on the page is family number 636, Paul and Bertha Gersh (or Gitch or Girsh, etc.) with children ages 12 and 10. I believe it is safe to say that the boys named on page 1 are probably members of this family. If you are interested in this family, be sure to request both pages OLA-C-1 page 1 and OLA-C-2 page 35. Remember that each page will have two sheets that may be copied separately.

On page 11 of section 2 of Aubry Township (AUB-T-2) the Claud (or Leland) and Sadie Corey family with daughter Q.V. are listed at the bottom of the sheet. There is a 2 year old son named P.J. Carey on line 1 of page 13. The assessor did not enter a family number for P.J. Carey, but he probably belongs with Claud and Sadie Corey who were named on page 11, since there is not another Corey or Carey family in Aubry Township in 1925.

Following is an explanation of some of the abbreviations found in this book. In the REL (relationship) column, the head of house was written Head. The members of the household were Wife, Son, Dau (for daughter), Brother, Sister, Mother, Father, Nephew, Niece, GrSon, GrDau (grandchildren), StSon, StDau, (step children), AdSon, AdDau,(adopted children), an assortment of in-laws, such as S-I-L, D-I-L, Bro-I-L, Sis-I-L, M-I-L, F-I-L, Aunt-I-L. Some who lived in the household were not related and were entered as None, Boarder, Lodger, Hired, etc.

The COL (color) column shows that most of the people in Johnson County were W (white). There were some entered as B (black) or C (colored), and a few MEX (Mexican) who were entered either Mex or W.

For the POB (place of birth) column and the FROM (where from to Kansas) column, we have use the postal two letter abbreviations, and for countries we used the first three letters of the name of the country, with a few exceptions. Austria was a fairly common home place and is

© 2014, Johnson County Genealogical Society and Library, Inc. Reproduction without permission is prohibited.

abbreviated AUS while Australia was given once and is identified as AUT. Some named Austria-Hungary which we abbreviated as AUS-HUN. If the immigrant named the province or county he came from, we used that. For example, CAN-ONT would be Ontario Province in Canada, CAN-NOV for Nova Scotia, CAN-BRC for British Columbia. Prussia is shown as GER-PRU. Alsace and Bohemia are not countries, but we cannot place them in a specific country, so they are listed as ALS and BOH respectively. One immigrant was born on the "Atlantic" and one "at sea". We show them as having been born "At sea". If the POB or FROM was given as Europe, we entered Europe in lower cases letters for that column. There is one entry for Indian. It is abbreviated as IND and could be American Indian or Asian Indian. There were a few entries for Washington and could be either State or District of Columbia.

Here is a list of the countries immigrants named as where they were born or from where they came.

Alsace	ALS	Armenia	ARM	Austria	AUS
Australia	AUT	Belgium	BEL	Bohemia	BOH
Br Columbia	CAN BRC	Canada	CAN	Cuba	CUB
Denmark	DEN	England	ENG	Europe	Europe
France	FRA	Germany	GER	Holland	HOL
Hungary	HUN	Indian	IND	Ireland	IRE
Italy	ITA	Luxemburg	LUX	Luxemburg/France	LUX/FRA
Mexico	MEX	Norway	NOR	Nova Scotia	CAN NOV
Ontario	CAN ONT	Poland	POL	Puerto Rico	PTR
Prussia	GER-PRU	Russia	RUS	Scotland	SCO
Sweden	SWE	Switzerland	SWI	Wales	WAL

Information in the CITIZENSHIP column is often confusing. The three columns are rarely completely entered. Many wrote a single letter, "a" or "n". It is up to you to discover if a single "n" means naturalized or perhaps "no". A significant number of immigrants had no information in these columns. Others have naturalization occurring the same year as the immigration. Any dates given should be considered possible clues for future research.

In the OCCUPATION column there are some entries that state RR, which we interpreted as Railroad. However, if they put RR Mail Clerk, this could mean Railroad or Rural Route. Tel Wire Chief could mean telephone or telegraph.

There were some helpful entries that really had no columns, but helped identify where people lived. Some assessors entered the name of the RFD (Rural Free Delivery) address and some the home address. As mentioned above, Schedule 2 will give the post office address for the farmers listed. This schedule follows the Population Schedule on microfilm and the original census sheets. Schedules 3-7 follow the Agricultural Schedule. All cities or townships used only the schedules applicable to their subdivision.

There were also some less-than-helpful entries when the assessors failed to enter data as directed by the instructions. Some assessors did not enter any relationships except the Head of House. Others wrote only initials—H, W, S, D, etc. for REL One assessor wrote Girl or Boy rather than Daughter or Son. Perhaps they are not daughter and son but niece and nephew. We can't tell.

© 2014, Johnson County Genealogical Society and Library, Inc. Reproduction without permission is prohibited.

Two times a daughter with two small children with her surname were living with her parents. The children's relationship was written as son-in-law and daughter-in-law. Since the relationship column refers to how they are related to the head of house, this is confusing.

There is more information to be found on the census sheets. We have not entered information from every column. As mentioned before, we did not enter the family numbers, which are in column 4 of the 1925 census. Columns 1, 2 and 3 might give you the name or number of the street or the rural route number, the number on the house, or the dwelling number. Columns 8 and 9 tell if your people owned their home or rented it, and if owned if it was free of mortgage. Column 21-23 asks if this person attended school and could read or write.

If you want copies of one or more of the pages that were not microfilmed, you will find them at the Kansas State Historical Society (KSHS) in Topeka, Kansas. (kshs.org). If you request a search at KSHS please specify that you need copies of the original paper pages because your page is not on the microfilm. Also, remember that each page of the 1925 census has two sheets. The original ones are separate and cannot be copied on one sheet of paper. Since the names are on the first sheet and the page numbers are on the second sheet, you need to match them up by providing names of your family members of interest and the page number, plus, of course, the name of the county and the city or township with section number, if applicable. This information is found in this book. However, do not use our abbreviations. Spell out the full name of the city and/or township with section number and page number, plus family member names. This will give the staff at KSHS the information they need to make a quick search.

Before requesting a copy of the 1925 census sheets, please contact KSHS to learn of their current procedures and costs.

If you are searching on Ancestry.com for a party you know was living in Johnson County as of March 1, 1925 and you cannot find him, delete the county and city or township. Search the Kansas State Censuses on Ancestry.com with the year and name only. Ancestry has some mix-ups that are confusing. We found section 2 of Gardner Township in Washington Township, Jewell County, Kansas. We also found Kingman City, Kingman County in Shawnee Township, Johnson County, Kansas. And there were others. Be thankful for Ancestry.com. It provides much data for us in many ways. We appreciate all we can find there, even if we have to hunt a bit.

Enjoy your search!
